14th International Congress of the Radiation Protection Association 9 - 13 May 2016, Cape Town – South Africa

Joint us at IRPA 14, the largest and most important radiological protection event in the world. The 14th International Congress of the International Radiation Protection Association (IRPA) is taking place in Cape Town, South Africa on May 9 -13, 2016.

IRPA is an “association of associations” – comprising some 50 associated societies representing 63 countries – which are national or regional professional organizations, for specialists in radiation protection.

IRPA provides a very easy way for members of associate societies to be involved in international radiation protection practice and the evolving radiation protection philosophy.

We are very excited that IRPA 14 will be celebrating IRPA’s 50th anniversary and will be the first IRPA International Congress to be convened on the African Continent.

The theme of the Congress is “Practising Radiation Protection – Sharing the Experience and New Challenges”.

The Congress will feature a comprehensive scientific and technical programme which is now taking shape, emphasizing the importance of cross cutting topics under the thematic areas of Fundamental Science, Philosophy and Principles, and Practical Application.

IT IS STILL POSSIBLE TO SBMIT ABSTRACT FOR POSTER PRESENTATIONS (deadline 29 February 2016).

IRPA 14 will also be offering a series of refresher training courses and an interactive technical exhibitions. Additionally, the social programme will provide delegates and accompanying persons with an opportunity to experience traditional African hospitality and enjoy the majestic splendor of the beautiful Western Cape. South Africa is also surprisingly inexpensive, currency exchange rates are quite favourable, and UNTIL 31 JANUARY 2016 MEMBERS CAN REGISTER AT THE DISCOUNTED ‘Early-bid’ rate. (see www.irpa2016capetown.org.za).

In short, join us at IRPA 14 and enjoy the experience !
